DEVONTRE C. YERBY

Principal Embedded Technical Architect - Enterprise Retail & Consumer Goods
Fredericksburg, VA | 202-868-7743 | dyerby@salesforce.com
http://www.linkedin.com/in/devontreyerby

Enterprise technical architect and experienced people leader with a background in Salesforce architecture, production AI delivery and strategic customer engagement. Currently driving Agentforce for Service adoption and technical delivery workstreams for Nike, including critical production escalations and cross-functional engineering coordination. Bringing previous direct people-management experience, executive-level communication and a track record of translating complex technical challenges into business outcomes.

Core Competencies

AI & Salesforce Architecture: Agentforce for Service, Data Cloud / Data 360, Service Cloud, Sales Cloud, Salesforce Flow, Apex (working knowledge), LWC (solution design), enterprise data modeling, API integrations.

Technical Delivery & Operations: Production AI readiness, technical workstream leadership, Sev-1 escalations, AI observability, consumption governance, deployment troubleshooting.

Leadership & Team Development: People management, performance coaching, cross-functional leadership, mentoring, stakeholder alignment, organizational development.

Enterprise Customer Strategy: Executive advisory, strategic account engagement, technical discovery, AI adoption, consumption optimization, customer enablement, product feedback.

Professional Experience

Salesforce, Virginia - Remote **2026-Present**

Principal Embedded Technical Architect | Enterprise AI Delivery | Salesforce Architecture & Technical Leadership

- **Enterprise AI Delivery Leadership:** Serve as an embedded technical architect for Nike, driving Agentforce for Service adoption, production readiness, and technical execution across enterprise customer service initiatives.
- **Mission-Critical Technical Escalations:** Led technical coordination and resolution of a Sev-1 real-time translation defect days before a major production launch. Reproduced the issue, collected diagnostic evidence, coordinated cross-functional engineering resources, and validated fixes in the customer sandbox to unblock go-live.
- **Executive Stakeholder & Risk Management:** Translated critical technical incidents into actionable business risk assessments for a strategic enterprise customer with approximately $3M in Agentforce for Service licensing supporting more than 3,000 users.

- **Production Agentforce Enablement:** Drove technical workstreams supporting Conversation Catch-Up, Service Replies, post-conversation summaries, and real-time translation through staging and production readiness. Identified configuration, automation, and workflow issues affecting successful deployment.
- **Cross-Functional Technical Leadership:** Led technical workstreams and coordinated Salesforce Product, Engineering, Support, cloud partners, and Nike stakeholders to prioritize issues, resolve delivery blockers, and advance enterprise AI initiatives.
- **Product Advocacy & Roadmap Feedback:** Partnered with Product Management to validate Agentforce feature behavior, identify functional limitations, and elevate enterprise customer feedback for potential product improvements.

Salesforce, Virginia - Remote **2021-2026**

Lead Solution Engineer / Service Cloud Specialist (Financial Services / Retail & Consumer Goods)

- Led business requirements discovery sessions to analyze and assess current workflows, using advanced analytical capabilities to craft detailed flowcharts that optimized end-user business processes. Enhanced productivity by fostering collaboration across multiple teams.
- Successfully managed B2B sales cycles, decreasing the average sales cycle time through data-driven decision-making and innovative approaches. Addressed RFP/RFI technical questions, developed Salesforce-based proof of concepts, and provided strategic guidance to support sales teams in delivering impactful solutions.
- Designed custom Salesforce objects, automations, and workflows, creating reusable assets that were adopted as a gold standard across engineering teams. Specialized in Service Cloud, Field Service, Employee Service, IT Services, and AWS Connect telephony to drive business outcomes in key industries.
- Contributed to product development and enhancement focus groups, uncovering profitability opportunities and providing actionable feedback to Product Management and Development teams. Integrated processes to strengthen partnerships with Salesforce System Integrators, driving seamless implementation and resolving recurring challenges.
- Contributed to the development and evolution of technical help docs by capturing lessons learned and best practices, supporting consistent team enablement and skill development. Provided coaching and constructive feedback to junior team members, fostering career growth and enhancing team performance.
- Developed technical sales assets and identified future sales opportunities, aligning resource strategies with measurable business outcomes. Implemented performance management frameworks to ensure alignment with organizational goals, receiving recognition for innovation and attention to detail.
- Delivered tailored solutions leveraging expertise in Manufacturing, Automotive, Energy & Utilities, and Retail & Consumer Goods industries. Built strong relationships with internal teams, including Product Marketing, Product Management, Development, and Sales, to secure support for strategic initiatives.
- Regularly presented technical and business insights to executive leadership and other stakeholders, effectively translating complex data into actionable strategies. Demonstrated proficiency in creating compelling narratives for both technical and non-technical audiences.

Bloomberg Industry Group, Arlington, Virginia **2020-2021**

Senior Salesforce Administrator

Bloomberg Industry Group provides trusted insights and tools for professionals in law, tax, government, and business to make informed decisions.

As a Senior Salesforce Administrator, the role involves managing and optimizing Salesforce instances for global users, ensuring seamless operations, implementing advanced workflows, and driving strategic initiatives to support business objectives.

- Managed multiple Salesforce instances for over 1,100 users worldwide, utilizing Sales Cloud, Service Cloud, CPQ, Shield, Knowledge, Communities, and integrations with enterprise tools like Jira, Confluence, DocuSign, and Oracle CPQ. Continuously leveraged industry best practices and technologies to deliver impactful results.
- Improved data integration methods and streamlined troubleshooting processes, increasing organizational coordination and reducing system downtime. Applied analytical insights to develop sustainable solutions and enhance operational efficiency.
- Developed and deployed solutions from sandbox to production environments using advanced release management practices, ensuring quality outcomes under tight deadlines and heavy workloads.
- Co-led discovery sessions with cross-functional teams to design and implement scalable solutions using Salesforce products. Consistently ranked as a top-performing administrator for delivering high-value results.
- Standardized help desk responses to reduce average resolution times and built custom data security measures using event monitoring and field audit trails. Promoted a culture of continuous process improvement.
- Partnered with Product Marketing, Product Management, and Development teams to ensure alignment on strategic initiatives. Provided guidance to technical and non-technical audiences, fostering collaboration and support for new initiatives.
- Supported team development by sharing knowledge, mentoring junior team members, and fostering career growth to elevate overall team performance.
